

# WAYPOINT SCP

## LINKING STUDENTS TO REALISTIC CAREER AND JOB OPTIONS IN THEIR OWN COMMUNITIES

### WHY WAYPOINT SCP?

WayPoint SCP is a comprehensive Transition Planning System that identifies your students' capabilities, interests, suitability and opportunities. These are then brought together in a real-time summary report to easily view, track, and report on transitional progress.

#### IDENTIFYING CAPABILITIES

Using our TAP Program, a battery of 10 tests that measure functional vocational aptitudes, we make it easy to assess your student's capabilities. This is a Formal Normed based assessment that can be used with all students – no reading is required, it can be group administered, and is transportable.

#### IDENTIFYING INTERESTS

Using our PIC Pathfinder program (Pictorial Inventory of Careers), we can assess your student's interests in certain work fields. By showing a variety of 8-10 second work scenes and capturing the student's response, this assessment is able to link the student's interest to the 17 Department of Labor's 17 career pathways. This assessment can be administered directly through the WayPoint SCP system, keeping it convenient, portable, and easily accessible.

#### IDENTIFYING SUITABILITY

Through the VIP Program (Vocational Implications of Personality), we can identify an individual's distinct personality type and begin to determine the best career path to follow. The VIP assessment can also be administered directly through WayPoint SCP and has options for non-readers and Spanish speaking students.

#### PULLING IT ALL TOGETHER

Once all these pieces are assessed, you can fine tune your options in our Career Management System. Abilities such as physical capacity, education levels, environmental needs, and work temperaments can be factored into our comprehensive job searching functionality to give you REALISTIC job option results.

In addition to job options, we also link to DOL, DOT, GOE and ONET to help those in charge to identify academic plans and develop skill sets to be successful in job placement or career training programs. And to complete the process, we offer a link directly to employers in the community with potential job options matching the unique characteristics of the individual.

- Easy-to-use cloud-based system
- Portable – can be used anywhere on most any platform (internet/wifi connection req'd)
- Detailed Summary of Performance (SOP) Reports
- Ability, Interests, Suitability assessments included
- Gives students and parents the ability to self-advocate – even from home!
- Brings assessments, job options, and job placement together in one place for a comprehensive Transition Planning System.
